About African Petroleum Corporation

African Petroleum Corporation is a dynamic, independent oil and gas exploration company operating eight licences in four countries offshore West Africa. The Company's assets are located in fast-emerging hydrocarbon basins, principally the West African Transform Margin, where several discoveries have been made in recent years, including African Petroleum Corporation's Narina-1 discovery in February 2012, which proved a working hydrocarbon system in the Liberian basin. With a combined net acreage position of 28,295km² through its licences in Côte d'Ivoire, Liberia, Senegal and Sierra Leone, the Company has matured its portfolio rapidly, acquiring more than 15,000km² of 3D seismic data and successfully drilling three wells, one of which was the first hydrocarbons discovery in the offshore Liberian deep-water basin.
